

Archigrafix Revit Families Loading Instructions

These loading instructions may vary depending on the version of Revit you may be using or your set-up. For specific instruction please refer to your Autodesk Revit Manual.

1 Copy Archigrafix .rfa files to your content library

- 1.1 The .rfa files are normally compressed into a zip file.
Unzip it to a folder in your local Revit content library.

In case your Microsoft Windows version does not uncompress zip files, please download the free utility 7zip on www.7zip.com.

2 Loading Archigrafix families into a revit project

- 2.1 Click Insert tab ➤ Load from Library panel ➤  (Load Family).

Depending on the current drawing units (imperial or metric), the Load Family dialog lists the family categories in either the Imperial or Metric Library.

- 2.2 In the Load Family dialog, double-click the category of the family that you want to load.

- 2.3 Preview any of the families (RFA) in the category:

- To preview a single family, select it from the list.
- At the top right of the dialog, under Preview, a family thumbnail image displays.
- To display a thumbnail image in the list for all families in the category, at the top right corner of the dialog, click Views ➤ Thumbnails.

- 2.4 Select the family that you want to load, and click Open.

The family type is now available to place in the project. It displays in the appropriate component category under Families in the Project Browser.

3 Support

- 3.1 Support questions should be directed by email to:
support@archigrafix.com. or by post to:
